DEMAND RESPONSE

A CRITICAL STEP IN GRID RELIABILITY AND SUSTAINABLE ENVIRONMENTAL INITIATIVES

Through NuEnergen Demand Response programs you receive payments for being on stand-by to lower your energy usage when the power grid is stressed and at a risk of failure.

From choosing the proper Demand Response programs, to Data Intelligence and Event Management, NuEnergen works closely with our clients to optimize their program participation.

NuEnergen provides our clients the ability to track energy consumption and event performance in real-time through the use of smart grid technology.

Our high touch service and customized approach results in the development of building specific operational protocols, including:

- Assessment of your building
- Development and review of Demand Response operations protocols
- Enrollment in applicable Demand Response programs
- Event Management and Communications
- Ongoing performance reviews

ENERGY SOURCING

WHERE ENERGY PROCUREMENT IS DONE ONE RELATIONSHIP AT A TIME

NuEnergen offers a fresh, custom tailored approach to electricity and gas procurement with a strong emphasis on attainment of your financial objectives.

We focus on supply agreement life cycle while keeping you well informed throughout the process. We understand your accounts better than any broker or consultant in terms of pre-contract work, resulting in better contract execution.

Based on your organization's needs, NuEnergen develops a comprehensive sourcing strategy, ensuring you are presented with the BEST sourcing option in order to optimize your costs while minimizing budget risk.

UTILITY INVOICE AUDITING

EFFECTIVE AND RISK FREE COST CONTROL OF YOUR UTILITY BILLS

Our risk free, 100% contingency based audits have recovered over \$50 million dollars for our clients since 2010.

Our audit team administers your costs optimization and refund claim initiatives for you. We perform a comprehensive 150 point check on all invoices, identifying errors that are typically overlooked.

NuEnergen is the chosen auditing firm for some of the most prestigious organizations in the world, in both the government and private sector. Regardless of where a client is located or the number of utility accounts, NuEnergen collects all billing information to be audited, researches relevant utility tariffs, constructs billing models, and works with utility companies to resolve disputes on our client's behalf. In the end, our goal is to recover all possible historical and ongoing billing discrepancies.

Current clients include Jones Lang LaSalle, CBRE, JP Morgan Chase, U.S. Navy, General Service Administration, New York Presbyterian Hospital and Tiffany & Co., among others.

GROSS RECEIPT TAX

Non-profit organizations that distribute electricity, gas or steam are eligible for remission of the NYC Gross Receipt tax. NuEnergen specializes in generating GRT credit claims on our clients' behalf. Our company guarantees 100% recovery of all GRT credits entitled to our clients.

COOLING TOWER CREDITS

Buildings that operate cooling towers are eligible to receive an 85% credit on the sewage portion of their water/sewer bills from New York City. NuEnergen has extensive experience in filing for sewer allowances and helping our clients obtain the financial credits they are entitled to.

BUSINESS INCENTIVE PROGRAM

NuEnergen's Auditing Department teams up with your organization to identify and optimize any and all available rebates and exemption programs offered by your city, local utility, state and in some cases federal organizations that may result in energy cost reductions.

TARIFF OPTIMIZATION SERVICES

NuEnergen aims to review and compare any existing utility service classifications to determine if the applicable rates are to our client's benefit. If NuEnergen's analysis reveals a more beneficial rate for our Client, NuEnergen will work with the utility to change the classification and lower costs.

REAL-TIME MONITORING

SMART GRID SERVICES FOR DECISION MAKING PROCESSES

NuEnergen offers an exclusive suite of Smart Grid services to ensure our clients are leveraging relevant information, analytics, and insights available to them.

Our energy information platform (EnerTrac), along with Real-Time Monitoring (RTM) technology, provides a complete integration of cost and energy usage, helping our clients to manage and optimize their energy consumption.

Using NuEnergen's information technology suite, our clients receive kW usage notifications when electricity usage patterns are out of their predefined limit boundaries.

This suite of services is not only vital during Demand Response events, but also during regular operation, as it represents the ability to monitor
