

# What is Invoice Auditing?

NuEnergen's auditing group reviews your energy invoices using our proprietary billing engines to isolate costly errors. Every line item is checked to confirm proper billing based upon the utility's tariff and associated third-party energy supply agreements.

## STEP 1: WE GATHER AND STORE YOUR INFORMATION

0034228283 \$4,564.344  
PEPCO 474,756 \$8,773.44  
\$353,433 \$767.42

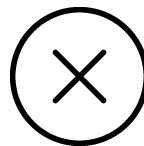

We identify all of your account numbers, energy providers and energy supply agreements.

We then get copies of all of your utility bill invoices.

... and then store all invoice information securely within our Enertrac Dashboard.

## STEP 2: WE CHECK FOR BILLING ERRORS

We run your usage data through our proprietary billing engines.

We then identify where the errors in billing occurred.

... and provide a detailed audit report to you identifying the errors.

## STEP 3: WE GET YOUR REFUND

We contact the utility and/or energy supplier with the discrepancy report outlining where the error(s) occurred.

We facilitate the refund process for you.

## BENEFITS TO YOUR ORGANIZATION

Invoice Auditing is the first step to energy efficiency. It is a plan designed to maximize savings, and guarantee accuracy in every utility bill.

We perform a comprehensive 100 POINT check list on all invoices identifying errors often overlook by others.

## WHAT WE CHECK

- Tax Codes & Status
- Rate Classification
- Monthly Usage Totals
- Duplicated Charges
- Market & Hourly
- Pricing
