

# What is Smart Grid?

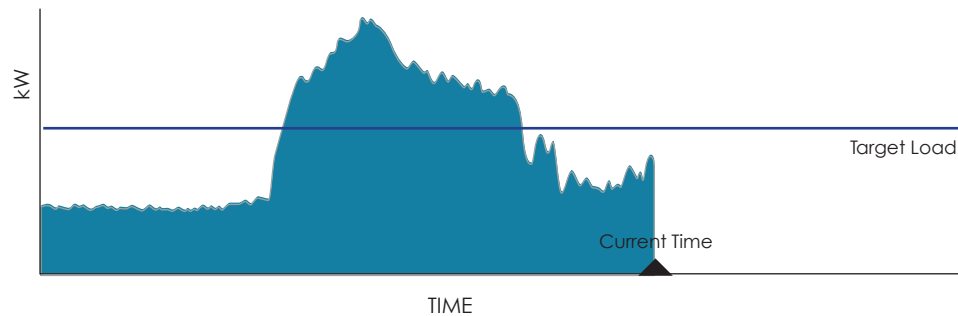

Find out exactly how much energy you are using at any moment. With NuEnergy's Smart Grid metering technology, you're able to monitor your real-time pricing through EnerTrac, our Online energy tracking dashboard.

## HOW DOES IT WORK?

After we install a NuEnergy Smart Grid RTM, you will monitor your energy demand in real-time through our EnerTrac dashboard. You'll be able to change your building operations to optimize Usage & Cost. As an added benefit, if you participate in a Demand Response program, EnerTrac will display the Target Load you need to reach during a test or event.

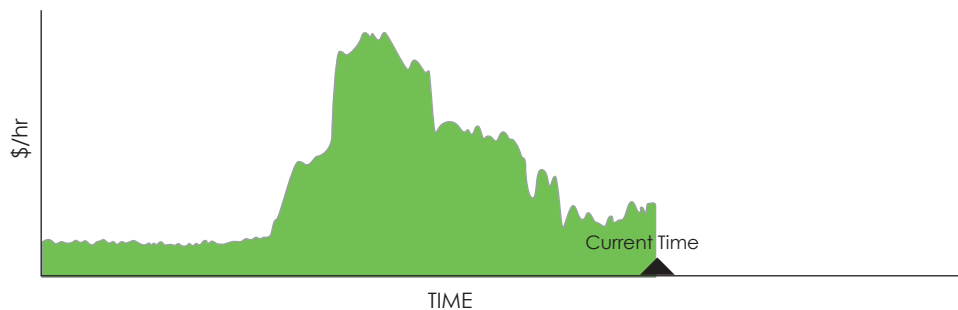

### REAL-TIME USAGE

Current usage: 429 kW

### REAL-TIME COST

Current cost: \$13.2/hr

## HOW DO I GET STARTED?

If you are interested in having real-time metering capability, NuEnergy will work with you to identify which accounts to monitor, how many meters you will need and help coordinate on-site meter installation.
